

In the Specification:

Please amend the specification as follows:

Page 1, after the title:

Cross-reference to related applications

This application claims priority to Swedish patent application no. filed 11 September 2003 and is the national phase under 35 U.S.C. § 371 of PCT/IB2004/002945.

Page 2, last paragraph:

The object set up is achieved, according to a first aspect of the invention, in that a rotating electrical machine ~~of the kind described in the preamble to claim 1~~ exhibits the special features that the drive circuit for the stator winding of the motor exhibits at least one branch which ~~comprises~~ includes an electric energy bank and a thyristor which are connected in series with the stator winding.

Page 4, third paragraph:

The above-mentioned and other advantageous embodiments of the invented rotating electric motor are described ~~in the claims which are dependent on claim 1~~ herein.

Page 4, fourth paragraph:

From the second aspect of the invention, the object set has been achieved in that a method ~~of the kind described in the preamble to claim 13~~ comprises that includes the special measures that the stator winding of the motor is connected via a thyristor to an energy bank.

Page 5, third paragraph:

With the invented use and the invented electric switch ~~stated in claims 15 and 16~~, advantages corresponding to those describe above are gained.

BRIEF DESCRIPTION OF THE DRAWINGS

Page 6, first paragraph:

Figure 8 illustrates an operating device for a three-phase switch.

DETAILED DESCRIPTION OF EMBODIMENTS OF THE INVENTION
